

# **Share your views on Performance and Image Enhancing Drugs (PIEDs)**

**If you inject PIEDs,  
we would like to speak to you.**

**A new study based at Curtin University  
aims to explore personal experiences  
of PIED injection.**

**The study is open to males in Victoria  
aged 18 and over.**

We are keen to hear your experiences  
and those of the people in your network.  
The purpose of the study is to gather information about  
experiences of injecting PIEDs,  
how people make decisions about their use, and  
their knowledge of how to mitigate any health risks.

**Participation involves a confidential audio recorded interview of  
about one hour, and you will be reimbursed \$50 for your time.**

Interviews will be conducted in the location of your choice in  
Victoria.

For additional information, or to participate in the study  
please contact:
